Sophomore Survey Procedures

1. At the beginning of each spring semester, students are identified as “eligible” to take the Sophomore Survey if they have earned 45-59 credit hours (by the end of the preceding fall semester), at least 30 hours of which are from ECU. For survey purposes, remedial math hours are not counted among the total hours earned. The Survey is usually opened during the first week in March and is closed in late April.

2. During the Spring semester, eligible students are notified via a variety of media that the required survey must be completed in order to be eligible for early registration for the following summer and fall terms. Students access the survey via OneStop.

3. Responses are compiled and forwarded to UNC-GA. A report is generated that compares responses from each of the other 16 UNC campuses.

4. A university-wide report of the responses, including the ECU-specific questions, is posted on the IPAR website.
