

No, no need to come back for foundation credit. I trust that you will tell students that the course receives foundation credit and what the goals of the Math foundation credit is.

Thanks for asking

Subject: Foundations Credit for MATH 1065

Linda,

I am the course coordinator for MATH 1065 and we are currently working on the course proposal form for the UCC as the current course description needs to be updated. Another prerequisite has been added and the topics that we cover have changed. Also, we are redesigning the course so that students will spend one hour a week in the classroom and a minimum of three required hours a week in a teacher-and-tutor-staffed learning lab. I know that MATH 1065 currently has FC credit. Do I need to complete the Request for Foundations Credit Form? I have never had to do this so I would appreciate any direction that you might give me.

Thanks so much!
