

The Safe Zone Program at ECU

If you see a color version (pink, green, and purple) of the above graphic, this means the person in that office or area has been through the ECU Safe Zone Program Training.

The Safe Zone Program @ East Carolina University is designed to create opportunities for our Gay, Lesbian and Bisexual Students and their allies to contact volunteers from the ECU faculty and staff that have attended an additional training session on GLBT issues, in an effort to develop a more open and honest environment.

This allows the faculty and staff to provide a higher level of personalized service to students, improving the quality of the interaction for both the faculty or staff member, and the student. The training program is still open to ALL faculty, staff and graduate assistants, as well as select student employees.
