

**Announcement  
East Carolina University  
Spring Career Fair  
Opportunity for Employers**

The East Carolina University Department of Chemistry strongly encourages area employers to recruit our excellent students as prospective employees. The department has finalized a procedure for appropriately coordinating these potential recruiting activities both internally and externally and a copy is attached for your use.

We will be utilizing the expertise and coordination of ECU's Career Center as the vehicle for providing interactions between our students and prospective employers.

There will be a Spring Career Fair for ECU students on **February 13, 2008**, and we encourage your firm to register for and take an active part in it. The Career Fair will be held in **The Greenville Convention Center** from 10:00 AM until 2:00 PM.

To register your firm to attend and recruit at this year's Career Fair, please visit the [Career Center website](#) to register.

We look forward to seeing you there and having you meet our upcoming Chemistry graduates.

Respectfully,

Keith D. Holmes, Jr.  
Department of Chemistry  
Office of External Relations
