How to Add the BA CHEM Second Major to Your BS BIOL Major

- You’re already taking the courses in purple for your BS BIOL major. Yay!
- **You just need to add the courses in gold to your degree plan.** The fastest possible timeframe for getting these done is 2 semesters, minimum. The courses are offered fall and spring semesters. Summer offerings may be available, but are not guaranteed.
- You will get only one diploma, but two majors (BS BIOL and BA CHEM).
- No foreign language (but learning another language is always muy buena).
- Email ChemGrad@ecu.edu to declare the BA CHEM major and get a CHEM faculty advisor (in addition to your BIOL advisor).
- Check out leadership opportunities in CHEM 2301 and 3301, and research opportunities in 4515, 4516, or 4517!
