Laura Langham:

Laura is the NC Sustainable Energy Association's Energy Efficiency Program Manager. In this role, Laura incorporates her M.S. in sustainable development with her 15+ years of experience in program management, research, education, and curriculum development to create and execute energy programs focusing on stakeholder collaboration, innovation, and the development and execution of solutions.

Laura has been an energy professional since 1993, managing national, state, and local programs in sustainable development, environmental stewardship, energy conservation, and residential energy management. She was awarded the 2012 Housing Outreach Award by the Housing Education and Research Association, the 2015 Industry Leader Award by NC Building Performance Association, and the 2015 Residential Green Design Environmental Award by City of Raleigh.
