LABORATORY SUPERVISOR
Position 500042

ECU College of Engineering and Technology seeks candidates for Laboratory Supervisor. This position of Laboratory Supervisor is designed to manage all instructional and research laboratories in the College of Engineering and Technology. The Laboratory Supervisor is part of a team that is responsible for preparing and equipping all laboratories in the College. This includes the repair of laboratory equipment, physically moving the laboratory equipment to an alternate area, assembling the laboratory equipment, and other activities required to ensure the laboratories are in proper working order. This position also provides support for faculty and students in the delivery of both laboratory instruction and laboratory-related research associated with the mission of the College of Engineering and Technology. The Laboratory Supervisor reports to the Director of Laboratory Operations. This position’s primary responsibility will be in support of the Construction Management Labs.

Applicants must complete a candidate profile online via the PeopleAdmin system and submit the documents requested in order to be considered for the position.
