PURPOSE

The NC Agromedicine Institute, AgriSafe of North Carolina and NC Cooperative Extension are collaborating to promote Certified Safe Farms in North Carolina by offering:

• AgriSafe occupational wellness reviews and personal protective equipment (PPE) selection,
• on-farm safety reviews and
• joint education and outreach.

The Certified Safe Farm program was developed and proven successful in Iowa. Results showed that Certified Safe Farms have lower health insurance claims costs and healthier, safer farmers, family members, and employees.

The Certified Safe Farm program is currently available in Duplin, Johnston and Sampson Counties.

Our goal is to expand statewide.

BENEFITS:

Safety Discounts
Insurance Incentives
Recognition by customers & community
