

Four collaborative projects involving faculty members in the College of Allied Health Sciences are the recipients of 2008-2009 Research Development Awards from the Vice Chancellor's office:

**The Determination of Reasons and Solutions for Low Quality ICD-9-CM Coding in Cardiovascular Cases: A Qualitative Approach**

Paul Bell and Xiaoming Zeng,

Department of Health Services and Information Management

**Sources of Abnormal Sensory Reweighting in Fall-prone Older Adults**

Leslie Allison, Department of Physical Therapy

Sherri Jones, Department of Communication Sciences and Disorders

**Motivate, Adapt, and Play (MAP): An Engagement Model of Physical Activity for Students with Intellectual Disabilities**

Kathryn Davis, Boni Boswell and James Decker, Department of Exercise & Sport Science, College of Health and Human Performance

Pat Hodson, Department of Physical Therapy

Guili Zhang, Department of Curriculum & Instruction, College of Education

**Effects of residential camp plus year-long family-centered follow up on movement characteristics and physical activity participation in overweight adolescents**

Amy Gross-McMillan, Ph.D., P.T.

Department of Physical Therapy

These internal awards, offered by the ECU Division of Research and Graduate Studies, fund pilot projects that permit the collection of feasibility data necessary for subsequent extramural grant submissions.
