

Selected Publications

Renegar, R.H., Chalovich, J.M., Leinweber, B.D., Zary, J.T. and Schroeter, M.M. (2009) Localization of the actin-binding protein fesselin in chicken smooth muscle. *Histochem. Cell Biol.* 131: 191-196.

Mathur, M.C., Kobayashi, T., and Chalovich, J.M. (2009) Some cardiomyopathy causing troponin I mutations stabilize a functional intermediate actin state (2009) *Biophysical J.* 96: 2237-2244.

Schroeter, M.M., Beall, B., Heid, H.W., and Chalovich, J.M. (2008) In vitro characterization of native mammalian smooth-muscle protein synaptopodin 2. *Biosci. Rep.* 28: 195-203.

Schroeter, M.M., Beall, B., Heid, H.W. and Chalovich, J.M. (2008) The actin binding protein, fesselin, is a member of the synaptopodin family. *Bioch. Biophys. Res. Commun.* 371: 582-586.

Jung, H.S., Burgess, S.A., Billington, N., Colegrave, M., Patel, H., Chalovich, J.M., Chantler, P.D. and Knight, P.J. (2008) Conservation of the regulated structure of folded myosin 2 in species separated by at least 600 million years of independent evolution. *Proc. Natl. Acad. Sci. USA* 105: 6022-6026.

Wang, H., Mao, S., Chalovich, J.M., Yan, Y., and Marriott, G. (2008) Analysis of tropomyosin dynamics in Ca²⁺-regulated cardiac thin filaments: Application of tethered donor probes for Foerster resonance energy transfer studies. *Biophys. J.* 94: 4358-4369.

Burgess, S.A., Yu, S., Walker, M.L., Chalovich, J.M. and Knight, P.L. (2007) Structures of smooth muscle myosin and heavy meromyosin in the folded, shutdown state. *J. Mol. Biol.* 372: 1165-1178.

Mathur, M.C., Kobayashi, T., and Chalovich, J.M. (2008) Negative Charges at Protein Kinase C Sites of Troponin I Stabilize the Inactive State of Actin. *Biophys. J.* 94: 542-549.

Khaymina, S.S., Kenney, J.M., Schroeter, M.M. and Chalovich, J.M. (2007) Fesselin is a natively unfolded protein. *J. Proteome Res.* 6: 3648-3654.

Gafurov, B., and Chalovich, J.M. (2007) Equilibrium distribution of skeletal actin-tropomyosin-troponin states, determined by pyrene-tropomyosin fluorescence. *FEBS Journal* 274: 2287-2299.

Pham, M., and Chalovich, J.M. (2006) Smooth muscle α -actinin binds tightly to fesselin and attenuates its activity toward actin polymerization. *J. Muscle Research and Cell Motil.* 27: 45-51

Schroeter, M.M. and Chalovich, J.M. (2005) Fesselin binds to actin and myosin inhibits actin-activated ATPase activity. *J. Muscle Research and Cell Motil.* **26**: 183-189

Gafurov, B., Fredricksen, S., Cai, A., Brenner, B., Chase, P.B. and Chalovich, J.M. (2004) The $\Delta 14$ mutation of Troponin T enhances ATPase Activity and Alters the Cooperative Binding of S1-ADP to Regulated Actin. *Biochemistry.* **43**: 15276-15285

Schroeter, M. and Chalovich, J.M. (2004) Ca^{++} -Calmodulin Regulates Fesselin induced Actin Polymerization. *Biochemistry.* **43**: 13875-13882

Gafurov, B., Chen, Y-D. and Chalovich, J.M. (2004) Ca^{++} and ionic strength dependencies of S1-ADP binding to actin-tropomyosin-troponin: Relationship among equilibrium binding, binding kinetics and ATPase activity. *Biophys. J.* **87**: 1825-1835

Wirth, A., Schroeter, M., E., deLanerolle, P., Chalovich, J., and Pfitzer, G. (2003) Inhibition of smooth muscle contraction and myosin light chain phosphorylation by p21-activated kinase pak1. *J. Physiol.* **549** (Pt 2): 489-500

Fredricksen, S., Cai, A., Gafurov, B., Resetar, A., and Chalovich, J.M. (2003) Influence of ionic strength, actin state, and caldesmon construct size on the number of actin monomers in a caldesmon binding site. *Biochemistry.* **42**: 6136-6148

Yan, B., and Chalovich, J.M., Chen, Y.D. (2003) Theoretical studies on competitive binding of caldesmon and myosin S1 to actin: Prediction of apparent cooperativity in equilibrium and slow-down in kinetics of S1 binding by caldesmon. *Biochemistry.* **42**: 4208-4216

Resetar, A.M., Stephens, J.M., and Chalovich, J.M. (2002) Troponin-tropomyosin: an allosteric switch or a steric blocker? *Biophys. J.* **83**:1039-1049

Beall, B. and Chalovich, J.M. (2001) Fesselin, a synaptopodin-like protein, stimulates actin nucleation and polymerization. *Biochemistry.* **40**: 14252-14259

Sen, A., Chen, y.-D., Bo, Y. and Chalovich, J.M. (2001) Caldesmon reduces the apparent rate of binding of myosin S1 to actin-tropomyosin. *Biochemistry.* **40**: 5757-5764

Chen, Y.-D., Bo, Y., Chalovich, J.M. and Brenner, B. (2001) Theoretical kinetic studies of models for binding myosin subfragment-1 to regulated actin: Hill Model vs. Geeves Model. *Biophys. J.* **80**: 2338-2349

She, M., Trimble, D., Yu, L.C. and Chalovich, J.M. (2001) Factors contributing to troponin exchange in myofibrils and in solution. *J. Muscle Res. Cell Motil.* **21**: 737-745

Leinweber, B., Tang, J.X., Stafford, W.F. and Chalovich, J.M. (1999) Calponin interaction with α -actinin-actin: evidence for a structural role for calponin. *Biophys. J.* **77**: 3208-3217

Brenner, B., and Chalovich, J.M. (1999) Kinetics of thin filament activation probed by fluorescence of N-((2-iodoacetoxy)ethyl)-n-methylamino-7-nitrobenz-oxa-1,3-diazole-labeled troponin. I incorporated into skinned fibers of rabbit psoas muscle: Implications for regulation of muscle contraction. *Biophys. J.* **77**: 2692-2708

Brenner, B., Kraft, T., Yu, L.C., and Chalovich, J.M. (1999) Thin filament activation probed by fluorescence of N-((2-(iodoacetoxy)ethyl)-N-methylamino-7-nitrobenz-2-oxa-1,3-diazole-labeled troponin I incorporated into skinned fibers of rabbit psoas muscle. *Biophys. J.* **77**: 2677-2691

Leinweber, B.D., Fredricksen, R.S., Hoffman, D.R., and Chalovich, J.M. (1999) Fesselin: a novel synaptopodin-like actin binding protein from muscle tissue. *J. Muscle Res. Cell Motil.* **20**: 539-545

Frisbie, S., Reedy, M.C., Yu, L.C., Brenner, B., Chalovich, J.M. and Kraft, T. (1999) Sarcomeric binding pattern of exogenously added intact caldesmon and its C-terminal 20-kDa fragment in skinned fibers of skeletal muscle. *J. Muscle Res. Cell Motil.* **20**: 291-303

Chalovich, J.M., Sen, A., Resetar, A., Leinweber, B., Fredricksen, S., Lu, F., and Chen, Y.-D. (1998) Caldesmon: binding to actin and myosin and effects on elementary steps in the ATPase cycle. *Acta Physiol. Scand.* **164**: 427-435

Frisbie, S.M., Xu, S., Chalovich, J.M., and Yu, L.C. (1998) Characterizations of cross-bridges in the presence of saturating concentrations of MgAMP-PNP in rabbit permeabilized psoas muscle. *Biophys. J.* **74**, 6: 3072-3082

Sen, A., and Chalovich, J.M., (1998) Caldesmon-actin-tropomyosin contains two types of binding sites for myosin S1. *Biochemistry*, **37**: 7526-7531

Frisbie, S.M., Chalovich, J., Brenner, B., and Yu, L.C. (1997) Modulation of crossbridge affinity for GTP by the state of the thin filament in skinned rabbit psoas muscle fibers. *Biophys. J.* **72**: 2255-2261

Heubach, J., Hartwell, R., Ledwon, M., Brenner, B., and Chalovich, J.M. (1997) Inhibition of cross-bridge binding to actin by caldesmon-fragments in skinned skeletal muscle fibers. *Biophys. J.* **72**: 1287-1294

Letters, Reviews, and Book Chapters

Chalovich, J.M. (2007) Equilibrium Binding of Proteins to F-Actin. *Methods in Molecular Biology*, A.O. Sperry Ed., Humana Press Inc., Totowa, NJ, 392: 1-22.

Chalovich, J.M., B. Yan, B. Brenner, and Y.D. Chen. (2002). Modeling thin filament cooperativity - Response. *Biophys J* 82:1679-1681

Chalovich, J.M. (2002) Regulation of striated muscle contraction: a discussion. *J. Muscle Res. Cell Motil.* 23:353-361.

Chalovich, J.M. and Pfitzer, G. (1997) Structure and Function of the Thin Filament Proteins of Smooth Muscle. in: *Cellular Aspects of Smooth Muscle Function*; Cambridge University Press. Edited by C.Y. Kao and Mary E. Carsten. New York, NY
