**BRODY SCHOOL OF  
MEDICINE ADMISSIONS  
2011-2013**

East Carolina University  
BRODY SCHOOL OF MEDICINE

Admissions Information  
2011-2013

Our goal at East Carolina University's Brody School of Medicine is to provide students the knowledge and clinical experience needed to attain successful careers in medicine. We believe that the journey through medical school can and should be one of life's most enriching and rewarding experiences.

The Brody School of Medicine provides a complete and challenging medical education designed to prepare physicians for service in the 21st century. The faculty and administration emphasize close personal attention to the needs of individual students; a firm and balanced foundation in scientific knowledge and humanistic patient-care skills; and adherence to traditions of service, achievement, and high ethical standards.

The medical school admitted its first class of four-year medical students in 1977. More than three decades later, the school is recognized as the centerpiece of a comprehensive academic medical center with doctoral (PhD) programs in the basic medical sciences, 23 residency and fellowship programs, extensive research activities, and service to patients in eastern North Carolina.

*Welcome*

# Enjoy the Journey

A principal mission of the school is to increase the supply of primary-care physicians to serve the state. Hence, preparation for careers in primary-care disciplines is emphasized. The school ranks high nationally each year in the percentage of its graduates who choose to specialize in family medicine, internal medicine, and pediatrics. No matter which specialty you choose, the school has been successful in preparing students for further training in any medical discipline and placing its graduates in some of the more highly regarded residency programs in the country.

Many elements make up the educational approach at the Brody School of Medicine, but among the most important are the relatively small class sizes, a highly competent and concerned faculty, and an exceptional environment for learning.

With 78 members in each entering class, students have the opportunity to know all their classmates to a degree not possible in larger classes. Thus, one's journey through medical school is a shared experience accomplished in a supportive atmosphere.

The faculty is the greatest strength of the educational program. By precept and example, the faculty upholds the standards of excellence that enable graduates to fulfill their professional duties throughout a lifetime of service. ECU's faculty has a reputation for being innovative, having pioneered the use of simulated patients in teaching and the use of standardized clinical practice examinations.

Supporting the faculty in its mission are the excellent facilities of the medical school and Pitt County Memorial Hospital, the primary affiliated teaching hospital of the school. These modern educational and

clinical facilities were carefully designed to meet the needs of students. Many student resources, including most classrooms, the student computer center, the Office of Student Affairs, and academic support and counseling services, are conveniently grouped on the second floor of the Brody Medical Sciences Building. These resources contribute to an educational atmosphere that encourages mature study, intellectual curiosity, and the formal and informal exchange of ideas and knowledge.

The medical-school curriculum has been carefully developed and is regularly monitored and adjusted to reflect the changes occurring in contemporary medical education and practice. The curriculum provides a logical integration of basic science and clinical science through a variety of teaching methods, including individual preceptorships at physician offices throughout the state. The use of the latest information technology in instruction and clinical practice is heavily emphasized.

The rewards of completing your medical journey at the Brody School of Medicine will follow you through your entire life.

Enjoy the journey.

## ADMISSION REQUIREMENTS

The Medical College Admission Test (MCAT) is required of all applicants who seek admission to the Brody School of Medicine. Information about this test, which is administered several times a year, may be obtained online at [www.aamc.org/students](http://www.aamc.org/students).

Applicants are asked to take this test in the spring, but no later than the fall, of the year prior to their desired matriculation date in medical school and to have the results sent to the Brody School of Medicine. Each applicant must have the equivalent of at least three years of acceptable work at an accredited college or university prior to matriculation into medical school. Applicants without a baccalaureate degree are admitted very infrequently.

No specific undergraduate major is required, but regardless of the major interest area, the applicant must have completed one year of each of the following courses, preferably prior to taking the MCAT and definitely prior to admission:

- General biology or zoology (including laboratory—may not be met by a botany course alone)

- General chemistry (including laboratory—must include courses in qualitative and quantitative analysis)
- Organic chemistry (including laboratory)
- Physics (including laboratory)
- English

While not required, courses in genetics, biostatistics, social science, humanities, and English (electives) are strongly recommended. Applicants are urged not to enroll in undergraduate or graduate courses likely to be repeated in the medical curriculum.

## RESIDENCE

The Brody School of Medicine is a state-supported medical school, and very strong preference is given to qualified residents of North Carolina who apply for admission.

## SELECTION FACTORS

Factors considered in selecting applicants for admission to the Brody School of Medicine encompass the social, personal, and intellectual development of each individual. To assess these areas of development, the admissions committee is guided by evaluations

received from faculty members who have taught the applicant (either individual letters or committee evaluations); other letters of reference (character and/or employment); interviews conducted by two members of the Admissions Committee; the applicant's prior academic achievement, employment, and/or professional experiences; and his or her level of achievement on the Medical College Admission Test (MCAT) and other standardized tests, if taken previously.

Because no single criterion can be applied in the selection of a medical student, each applicant is viewed as an individual. All available information is used to best determine the character and qualifications for the study of medicine.

The Brody School of Medicine acknowledges its responsibility as a state-supported school to select students and ultimately provide physicians who will meet the needs of all residents of the state. In meeting this responsibility, the Brody School of Medicine seeks competent students of diverse personalities and backgrounds. Special effort is made to include in each entering class students from diverse geographical, economic, and ethnic groups. The admissions committee

evaluates all applicants without discrimination based on race, religion, sex, color, national origin, age, or disability.

## TECHNICAL STANDARDS

The Brody School of Medicine has both the interest and experience in accommodating certain disabilities without compromising the integrity of the curriculum or the academic achievement required of all students. Technical standards defined in the *Bulletin* describe the nonacademic qualifications that the school considers essential for the successful completion of the medical education program.

A medical school applicant requesting special consideration or accommodation on the basis of a disability may be requested to provide pertinent information for review by the Admissions and Student Affairs officers. All decisions regarding applicant requests for special consideration or accommodation will be made on an individual, applicant-by-applicant basis after careful review and thorough consideration of all relevant factors, in keeping with East Carolina policies.

Applicants should be aware that the National Board of Medical Examiners is the sole authority for granting

accommodations for the United States Medical Licensing Examination. The provision of special consideration or accommodations by a medical school does not ensure that the National Board of Medical Examiners will provide any similar considerations or accommodations for the United States Medical Licensing Examination.

### **APPLICATION PROCEDURE**

The Brody School of Medicine participates in the American Medical College Application Service (AMCAS). The deadline for application is November 15. The AMCAS application is available at [www.aamc.org/students](http://www.aamc.org/students). In recent years, only North Carolina residents have been allowed to submit an AMCAS application. The Brody School of Medicine will use the AMCAS application as a preliminary application form. Applicants will be notified that their application has been received and, in selected cases, will be requested to submit supplementary application materials that will include the following items:

- Either three individual evaluations from faculty who have taught the applicant or a single recommendation from the preprofessional (premedical) committee of the applicant's school(s) is required. Personal, character, or employment references are welcomed to supplement the academic letters.
- A recent passport-type photo.
- A \$70 application fee. Check or money order should be made payable to East Carolina University. This fee is nonrefundable, nondeductible, and subject to change.
- A 300–500-word essay reflecting the applicant's reasons for desiring medical study, future professional aspirations, his/her areas of vocational interest, and major reactions to contemporary life experienced during the past several years.

# Interviews

Supplementary application materials that are either 1) unsigned or undated (including the application form and Statement of Residence), or 2) missing any required component will be viewed as incomplete and will not be processed.

The Medical College Admission Test (MCAT), revised in 1991, is required of all applicants. This test is administered at various times through the year. Scores that are more than three years old at the time of application will not be considered. Therefore, test results from 2008 and later will be valid for applications to the class that matriculates in August 2012.

## INTERVIEWS

Two individual interviews conducted by two members of the Admissions Committee are an integral part of the evaluation of applicants. These interviews will be requested of applicants selected for visitation at a definite stage of admissions processing. An invitation to appear on campus for interviews does not imply acceptance to the Brody School of Medicine, but it is an important part of the selection process. The interviews allow members of the Admissions Committee to become better acquainted with the applicants and allow the applicants to meet members of the faculty and student body, see the facilities, and learn more about the Brody School of Medicine.

## ACCEPTANCE PROCEDURE

Individuals selected for admission must remit a deposit fee of \$100 within three weeks of notification of acceptance. Checks or money orders for this amount should be made payable to East Carolina University. This deposit will be credited to tuition and fees. Before May 15, the fee will be refunded if accepted applicants decide not to enroll after remitting the deposit. No

refund will be provided after May 15. This deposit is forfeited if an accepted applicant does not register at the appropriate time.

Following completion of all course work, and prior to matriculation into the Brody School of Medicine, accepted applicants should request that one complete transcript of course work be sent to the Admissions Office, the Brody School of Medicine, Mail Stop 610, East Carolina University, Greenville, North Carolina 27834-4354. The accepted applicant should recognize that acceptance to the Brody School of Medicine occurs prior to matriculation. Implicit in this agreement of acceptance is the understanding that applicants will maintain an acceptable level of academic achievement and personal deportment during the conclusion of their undergraduate training and will complete all anticipated degree requirements. Failure to do so will result in a re-examination of the applicant's credentials and the possible withdrawal of the offer to matriculate.

## EARLY DECISION PLAN

An Early Decision Plan, offered only for residents of North Carolina, is described in the AMCAS instructions. Well-qualified applicants are encouraged to consider this plan. The application deadline for the Early Decision Plan is August 1, and candidates are notified of the committee's decision no later than October 1.

## ADVANCED STANDING ADMISSION

Applications for advanced standing are considered only if vacant positions exist in classes beyond the freshman year. Such openings are infrequent. Residents of North Carolina will be given very strong preference for any available positions.

# Financial

## Estimated Academic Expenses 2011-2012

### Tuition\*

North Carolina Resident	\$5,268.50/semester	\$10,537/year
Nonresident	\$18,289.50/semester	\$36,579/year

### Fees\*

North Carolina Resident	\$1,053.37/semester	\$2,106.74/year
Nonresident	\$1,053.37/semester	\$2,106.74/year

\*Tuition and fees are subject to change without prior written notice. (Fees include the clinical skills fee, university fees, laboratory fee, and disability insurance.)

### Health Insurance

Health insurance is required and may be obtained via Pearce & Pearce Student Insurance Specialists. Students who are already covered by existing health plans can easily waive out of the health policy adopted by ECU. Students without coverage from an existing health plan will be automatically enrolled into the policy provided by Pearce & Pearce.

ESTIMATED EXPENSES	1ST YEAR	2ND YEAR	3RD YEAR	4TH YEAR
Tuition and Fees	\$12,643.74	\$12,643.74	\$12,643.74	\$12,643.74
Laptop	\$1,200.00	N/A	N/A	N/A
Books and Supplies	\$800.00	\$490.00	\$535.00	\$250.00
Health Insurance	\$900.00	\$900.00	\$900.00	\$900.00
Living Expenses (rent, utilities)	\$7,187.00	\$8,016.00	\$8,948.00	\$7,643.00
Food	\$3,367.00	\$3,915.00	\$4,370.00	\$3,732.00
Transportation	\$2,589.00	\$2,980.00	\$3,305.00	\$3,578.00
Personal/Miscellaneous	\$2,752.00	\$3,198.00	\$3,569.00	\$3,049.00
USMLE Step 1 exam	N/A	\$525.00	N/A	N/A
USMLE Step 2 exam	N/A	N/A	\$1,120.00 (cs)	\$525.00 (ck)
<b>TOTAL ESTIMATED EXPENSES</b>	<b>\$31,438.74</b>	<b>\$32,667.74</b>	<b>\$35,390.74</b>	<b>\$32,320.74</b>

# Curriculum

(Curriculum subject to change; (a)=fall term; (b)=spring term)

## First Year Duration: 38 weeks

- Basic Human Genetics (b)
- Doctoring (a, b)
- Ethical and Social Issues in Medicine I (a)
- Medical Biochemistry (a)
- Gross Anatomy and Embryology (a)
- Medical Histology (a)
- Medical Neuroscience (b)
- Behavioral Sciences (b)
- Medical Microbiology and Immunology I (b)
- Medical Physiology (b)
- Primary Care Preceptorship (b)
- M1 Pirate MD Course (a, b)

## Second Year Duration: 38 weeks

- Clinical Skills (a, b)
- Ethical and Social Issues in Medicine II (a)
- Introduction to Medicine (a, b)
- Medical Genetics (b)
- Medical Microbiology and Immunology II (a)
- Medical Pathology (a, b)
- Medical Pharmacology (a, b)
- Psychopathology (a, b)
- Primary Care Preceptorship (b)
- M2 Pirate MD Course (a, b)

## Third Year Duration: 50 weeks (Clinical Rotation)

### Required Clerkship

- Cardiovascular Medicine (2)
- Family Medicine (8)
- Medicine (8)
- Obstetrics/Gynecology (6)
- Pediatrics (8)
- Psychiatric Medicine (6)
- Surgery (8)
- Elective (2)

## Fourth Year Duration: 40 weeks

### Required Rotations

- Emergency Medicine (4)
- Acting Internship (4)
- Intensive Care Unit (4)
- Primary Care (4)
- Physical Medicine & Rehab (2)
- Electives (14)\*
- Transition to Residency (2)
- Vacation/Personal Development (6)

\*[www.ecu.edu/cs-dhs/bsomstudentaffairs/2012\\_M4-Electives.cfm](http://www.ecu.edu/cs-dhs/bsomstudentaffairs/2012_M4-Electives.cfm)

## MD/MBA PROGRAM

The MD/MBA dual-degree program is open to currently enrolled medical students and physicians in residency-training programs. This additional 12-month program provides 42 semester hours of business courses, and both the MD and MBA degrees are awarded after five years of study. Interested medical students must complete a separate application process and, if accepted, typically fulfill the MBA classroom requirements between their second and third years of medical studies. The Graduate Management Admission

Test (GMAT) is not required, but successful passage of the USMLE Step I is necessary for continued enrollment in the dual-degree program.

## MD/MPH PROGRAM

The MD/MPH dual-degree program is open to currently enrolled medical students and physicians in residency-training programs. This additional 12-month program consists of 42 semester credit hours and can be completed by medical students taking MPH course work during the period between the second

# Programs

and third years of medical school and summer vacations. The GRE is not required (MCAT scores will be used), but successful passage of the USMLE Step I and good standing in the medical school are necessary for continued enrollment in the dual-degree program. Additional information is available from the Brody School of Medicine Office of Admissions or the Division of Community Health and Preventive Medicine, which can be reached at 252-744-4079.

## **MD/PHD PROGRAM**

Students may also apply at any time after their enrollment in the MD program for a combined MD/PhD option, which they begin after successful completion of the USMLE Step I exam. Accepted students can take up to four years to complete the PhD requirements and participate in a clinical skills component during the year prior to their re-entry into the MD curriculum.

## **EARLY ASSURANCE PROGRAM**

In an effort to attract more superb students to ECU, the Honors College and the Brody School of Medicine offer an Early Assurance Program for the BSOM. Under this program, approximately four of the 78 seats in the BSOM entering class are reserved—four years in advance—for selected students who are North Carolina residents entering ECU as freshmen. All applicants to the ECU Honors College are asked to indicate if they are interested in the Early Assurance Program, and a select group of interested nominees are subsequently interviewed by BSOM Admission Committee representatives as part of the selection process. The BSOM contingent then ranks these applicants after the interview process is completed, and positions in the Early Assurance Program are offered accordingly. An appropriate number of alternate candidates are

also named and encouraged to participate in program activities, so that they will be eligible to fill any vacancies that may occur over the ensuing four years.

Students who are awarded a position in the Early Assurance Program must maintain certain academic standards and participate in various activities to remain eligible for their seat in the BSOM entering class. Students in the Early Assurance Program who remain eligible and interested will complete an application to the BSOM via the American Medical College Application Service early in their junior year and will be exempt from both the secondary application fee and the Medical College Admission Test requirement. For additional information about Early Assurance and the ECU Honors College, please visit [www.ecu.edu/cs-acad/earlyassurance/](http://www.ecu.edu/cs-acad/earlyassurance/), or call 252-328-6373.

## **FINANCIAL AID**

A medical education represents a major investment of time, effort, and money. If you will be responsible for paying for your medical education, then you need to prepare a financial plan that will work in conjunction with your career plan. Starting medical school with your financial affairs in order means you can concentrate on the challenging academic work that lies ahead with fewer distractions.

An honest discussion with your family regarding financing options is essential when planning your future as a student. We understand that this is not always an easy conversation, so we have prepared a list of issues that should be covered during these discussions:

- Will your family help to pay relocation expenses including travel, shipping, deposit, and utility-connect charges if you move to the Greenville area?

# Facilities

- What expenses, if any, is your family able and willing to pay?
- Will your parents' health and automobile insurance plan cover you as a full-time student, or will you need to purchase your own coverage?
- Can you call on your family in a financial emergency, or must you be prepared to handle such situations on your own?
- Will your family be willing to assist with interest payments on your unsubsidized loans while you are in school?

Applicants are also encouraged to complete the Free Application for Federal Student Aid (FAFSA) at [www.fafsa.ed.gov](http://www.fafsa.ed.gov). The Department of Education will determine your Estimated Family Contribution (EFC) using the information supplied on the FAFSA. The Financial Aid Office will use the EFC to determine what types of loans, grants, or scholarships for which you might be qualified.

You should submit the FAFSA as soon as possible after January 1 of each year. For students who are filing a tax return, we recommend that you wait to submit your FAFSA until after you have filed. You do not have to be accepted for admission first to apply for financial aid. Once the required information is received, your financial aid award will be “packaged” and sent to you in an award letter.

Finally, there are outside scholarship opportunities that students may choose to apply. A complete list can be found on the Brody School of Medicine website. (Click “Student Affairs,” followed by “Financial Aid.”)

## **FACILITIES** **Brody Medical Sciences Building**

The Brody Medical Sciences Building opened in 1982

and expanded in 1989–1990. The 489,000-square-foot facility provides modern and comfortable accommodations for students, faculty, and staff, as well as convenient access to both the school's academic support programs and Pitt County Memorial Hospital.

The Brody Building includes a 525-seat auditorium and administrative offices for the Brody School of Medicine and the Division of Health Sciences. Another important component of the Brody Building is the Brody Outpatient Center for general, diagnostic, and subspecialty ambulatory care. Near the Brody Building are the Leo W. Jenkins Cancer Center, the Edward N. Warren Life Sciences Building, and the Biotechnology Building.

## **Health Sciences Building**

The four-story Health Sciences Building on Highway 43 opened in 2006 and houses Laupus Library and the colleges of allied health sciences and nursing. Among the many features of the 303,000-square-foot building are concepts-integration and patient-simulation labs, which give nursing students the opportunity to perfect their techniques and clinical skills in a controlled environment before working with actual patients; classrooms with technology stations; distance education; the new Speech-Language and Hearing Clinic; and research labs. The library has a computer lab, study carrels, and casual reading spaces, as well as a 7,000-title history collection.

The site is providing interdisciplinary health-sciences education, where doctors, nurses, and other health-care providers learn to work effectively in teams. Architects designed the building to encourage shared use of large classrooms, common space, and courtyards. The schools and library have separate ground entrances and joint upper-floor hallways.

# Services

The Health Sciences Building was made possible by a \$3.1 billion, higher-education facilities bond referendum, which was passed in November 2000. At the time, it was the largest voter-approved bond program for higher education in the United States.

## **Pitt County Memorial Hospital**

Pitt County Memorial Hospital is one of the leading medical centers in North Carolina. The hospital is the clinical training site for more than 1,300 health-sciences students each year, including more than 300 medical residents and 300 medical students. The hospital is the flagship of University Health Systems of Eastern Carolina.

Originally a community hospital serving Greenville and Pitt County, PCMH has become the principal referral hospital for eastern North Carolinians. It maintains its community hospital mission, but because of the availability of a diversity of medical specialties and services, the hospital now serves an estimated 1.3 million people in 29 counties in eastern North Carolina.

With 861 beds, PCMH is a tertiary-care hospital with critical-care units for medical, surgical, neurosurgical, pediatric, trauma, cardiac, and cardiac-surgery patients. Other facilities include a free-standing surgery center, a birthing center, a sleep disorders center, a hemodialysis unit, a 75-bed rehabilitation center, a behavioral health unit, a pain management center, a toxicology service, a 52,000-square-foot wellness center, and the 100-bed Children's Hospital, which includes a Level-III neonatal intensive-care unit. The emergency department serves 25 outlying hospitals as a Level-I regional trauma center.

PCMH employs more than 7,800 people. Each year, the 648 physicians on its medical staff provide care to more

than 42,000 inpatients and 263,000 outpatients and deliver more than 3,800 babies.

## **East Carolina Heart Institute**

The ECHI comprises two buildings. Located near the Warren Life Sciences Building, the four-story ECU building houses offices and research labs for cardiologists, cardiothoracic surgeons, vascular surgeons, and scientists. The 206,000-square-foot, \$60-million, state-funded building also houses outpatient treatment facilities and educational facilities for students, physicians, and scientists.

Built on Moye Boulevard, Pitt County Memorial Hospital's six-story cardiovascular bed tower houses six operating rooms, 11 interventional labs, and 120 patient beds. University Health Systems of Eastern Carolina—the parent company of Pitt County Memorial Hospital—paid for the construction of the \$150-million, 375,00-square-foot building.

## **SUPPORT SERVICES**

### **Office of Student Affairs**

The Office of Student Affairs is the administrative unit responsible for a wide range of support services and development activities for medical students. Beginning with orientation for the first year of medical school and continuing through each year until Match Day and graduation, the office stands ready to meet students' individual needs. Included in the office's responsibilities is the coordination of financial aid services.

### **Office of Medical Education and Student Development**

The Office of Medical Education and Student Development (OMESD) at the Brody School of Medicine works to maximize the academic success

and the personal and professional development of all medical students. To achieve this mission, the staff of OMESD provides a variety of support services including academic counseling, personal counseling, and career-planning activities. Our office is committed to working collectively with the faculty and administration to make sure that every student is valued, supported, and grows in their capacity to lead and serve.

### **ECU and Greenville, NC**

East Carolina University was founded in 1907 as a state-supported teacher training school and became a liberal arts college in 1941. The school developed and grew rapidly, becoming a state university in 1967 and a constituent campus of the University of North Carolina system in 1972. Today, with an enrollment of nearly 28,000, ECU is classified as a Doctoral II research institution.

The university is located in Greenville, the business, medical, and educational hub of eastern North Carolina. The Main Campus is adjacent to downtown, while the Health Sciences Campus is adjacent to Pitt County Memorial Hospital in west Greenville. The small city, home to approximately 81,000 people, is located 50 miles east of Raleigh. Greenville is within easy driving distance of coastal and beach resorts and the Outer Banks, as well as Richmond, Virginia, and Washington, D.C.

## Notice of Nondiscrimination

East Carolina University is committed to equality of opportunity and does not discriminate against applicants, students, employees, or visitors based on race, color, creed, national origin, religion, sex, sexual orientation, age, veteran status, political affiliation, genetic information, or disability.

East Carolina University supports the protections available to members of its community under all applicable federal laws, including Titles VI and VII of the Civil Rights Act of 1964, as amended; Title IX of the Education Amendments of 1972; Section 799A and 845 of the Public Health Service Act; the Equal Pay Act 1963, as amended; the Age Discrimination in Employment Act of 1967, as amended; the Rehabilitation Act of 1973, as amended; the Pregnancy Discrimination Act of 1978; the Civil Rights Restoration Act of 1988; the Vietnam Era Veteran's Readjustment Assistance Act of 1974; the Civil Rights Act of 1991 and the Americans with Disabilities Act of 1990, as amended Title II of the Genetic Information Non-discrimination Act of 2008; and Executive Order 11246 of 1965, as amended; the N.C. General Statutes Section 126-16, as amended and other applicable federal and state laws.

In compliance with Section 504 of the Rehabilitation Act of 1973, as amended, and the Americans with Disabilities Act of 1990, as amended, accommodations of the disabled extend to student programs, employment practices, elimination of physical barriers, and special assistance to disabled students and employees within the University.

This nondiscrimination policy covers admission, readmission, access to, and treatment and employment in University programs and activities, including, but not limited to, academic admissions, financial aid, any services, and employment.

Any student who has an issue or concern in regard to his or her rights under Title IX may inquire first with the Dean of Students Office. Any member of the University community desiring information or having a complaint or grievance in regard to these provisions should contact the Associate Provost for Equity, Diversity and Community Relations, Dr. Taffye Benson Clayton, Office of Equity, Diversity and Community Relations, Suite G-406 Old Cafeteria Building, East Carolina University, Greenville, NC 27858-4353. Telephone 252-328-6804. Internet: [www.ecu.edu/edc](http://www.ecu.edu/edc).

East Carolina University is an equal opportunity/affirmative action university that accommodates the needs of individuals with disabilities.
