The CASPer Test (Computer-Based Assessment for Sampling Personal Characteristics)
All applicants are required to complete an online assessment (CASPer), to assist with our selection process.

CASPer is an online test which assesses for non-cognitive skills and interpersonal characteristics that we believe are important for successful graduates of our program, and will complement the other tools that we use for applicant screening. In implementing CASPer, we are trying to further enhance fairness and objectivity in our selection process.

In order to take CASPer, you will be responsible for securing access to a computer with audio capabilities, a webcam, and a reliable internet connection on your selected test date.

Please go to www.takeCASPer.com to sign up for an account using a government-issued photo ID. Following that, you will need to sign up for the American Graduate Medical Education test using your AAMC ID.
Please note that the only testing date available for your CASPer test for this application cycle is August 6th 2018. There will be no additional tests scheduled. Please use an email address that you check regularly; there may be updates to the test schedule.

Content and format:
The CASPer test is comprised of 12 sections of video and written scenarios. Following each scenario, you will be required to answer a set of probing questions under a time contract.
The test typically takes between 75 – 90 minutes to complete.

Cost to the applicant:
$40 base fee to take the test, plus $10 to distribute to your program

Please direct any inquiries on the test to support@takecasper.com.
