WARNING SIGNS DURING PREGNANCY

Call your doctor's office if you notice any of the following:

1. Bleeding from your birth canal
2. Sharp or continuous abdominal, or stomach, pain
3. Fever
4. Pain or burning on passing urine
5. Severe vomiting
6. Dizziness or fainting
7. Severe headaches
8. Blurred vision or spots before your eyes
9. Leaking or gush of water from your birth canal
10. Labor contractions that become strong and regular before your baby is due
11. You feel the baby move less than 6 to 8 times in 12 hours
