The 5P’s Framework Assessment: Exercise I

Purpose: To achieve the best possible outcomes for patients.

Patients: Who form different subpopulations such as post partum patients, newborns and antepartums patients.

(Patients interact with professionals)

Professionals: MDs, RN’S, Pharmacists, Physical Therapists, Dietitians, Social Workers, Lab Tech, etc.

(Staff /patients work together to meet patients’ needs by engaging in direct patient care processes)

Processes: Accessing systems and needs, diagnosing problems, creating treatment plans and following up.

(The results of these interactions (patient to staff to clinical and support processes) produce patterns)

Patterns: Patterns measure safety, functional status, risk, patient satisfaction and cost outcomes.
