### **Program Coordinator**

Tammy C. Jones

From the Director:

Welcome to the Med-Peds Program at the Brody School of Medicine at ECU and Vidant Medical Center! We are delighted that you are looking at our program. If you are exploring our website it is likely that you are already very interested and excited about pursuing a combined internal medicine and pediatric residency training program and we hope that our website will provide a first glimpse of our dynamic and strong training program.

Med-Peds is deeply rooted in the history of medicine and embodies the best attributes of each of the categorical training programs. Med-Peds training is ideally positioned to continue to advance to the forefront of healthcare in the future. Here at ECU we feel that same sense of being firmly grounded in the foundations of primary care while also pushing the boundaries of what dedicated, well-trained Med-Peds physicians can do.

The first thing you will note about our program is the sense of family. From our wonderful program coordinator, to our faculty and nurses in our combined med peds clinic, you will work with people who are dedicated to each other, to the well-being of our patients, and to resident education.

We are a diverse and clinically oriented program that will provide you with ample opportunities for clinical experience in the inpatient and outpatient settings, and prepare you for any of the numerous career opportunities that med peds provides. Our faculty are involved in many leadership positions in the Brody SOM and are involved in local, state and national medical professional organizations. We take the commitment to continuing medical education seriously for ourselves and thereby serving as examples to our residents.

We hope that you find our website helpful, but you are certainly encouraged to contact me directly if you have any questions.

Thank you for your interest in our program and we look forward to receiving your application. I look forward to the opportunity to meet you in person during an interview.

Sincerely,

Mary Catherine Brake Turner, MD, FACP, FAAP  
Clinical Assistant Professor  
Medicine-Pediatrics Program Director  
Department of Pediatrics, Division of Internal Medicine-Pediatrics
