

Kristin (Weisz) Largena

Kristin graduated in 2002 and she resides in Hampton, VA. She married her high school sweetheart, Kevin. Her greatest class memory was winning the research award with Crystal Legg Helmkamp on Disability Awareness and presenting it at the research symposium. Her greatest accomplishment since graduating is becoming senior occupational therapist at Dominion Pediatric Therapy, where she currently works in Newport News, Va. She has also recently taken on the position of Assistant Coordinator with more management responsibilities. In the past, Kristin has worked for southeastern Physical Therapy in adult group homes and day programs with adults with developmental disabilities. She specializes in pediatrics, particularly in feeding and sensory integration. Her favorite moments are when you make a difference and you see the look of pride and accomplishment in the kids' faces. She loves all the cute stories from the kids and she feels so refreshing when after she's had a "beat down" day, and one of the kids say something like "K is for Miss Kristin". Her hobbies are playing pool at home and in a league with her husband. She also enjoys selling Beauticontrol products and providing Spa Escapes for people in their homes. She would like to achieve further management responsibilities as well as increasing in her specialization in pediatric practice.
