

Melanie Schoendorf, graduate of the class of 2002, is currently living in the beautiful weather of Florida where she is working full time at Florida Hospital Celebration in the outpatient pediatric area. She has also become a registered therapist in hippotherapy (with horses) and is hoping to soon get into an NDT certification course in pediatrics. Before taking her full-time job at Celebration, Melanie tried out the school system setting and was also doing home health pediatrics and working in acute care at the hospital on the weekends, but is now much happier to have one job to focus on and enjoy. Melanie is currently living with her sister who is getting married this year, and she has been dating a family medicine physician in Celebration for the past year and a half.
