

Revised 09/02/2009

## The University

East Carolina University (ECU) boasts the only Physician Assistant Program offered in the University of North Carolina system. ECU enrolls more than 23,000 students each year. The university, which serves as a focal point in eastern North Carolina for business, medicine and higher education in many fields, offers Programs through the College of Arts and Sciences and the professional Schools of Art, Business, Education, Health and Human Performance, Human Environmental Sciences, Industry and Technology, Music, and Social Work and Criminal Justice Studies. The Division of Health Sciences is comprised of the Colleges of Allied Health Sciences and Nursing, the Health Sciences Library and the School of Medicine. Pitt County Memorial Hospital (PCMH) serves as a teaching hospital for the School of Medicine and also operates a family practice center, radiation-oncology center and outpatient clinics in several medical specialties. More information is available at <http://www.ecu.edu/>.

The ECU Physician Assistant Studies Program enrolled its first class in 1997, and that class graduated in 1999 with a bachelor's degree. The first master level class enrolled in May 2003 and graduated in 2005 with a Master of Science (MS) in PA Studies. The ECU PA Program no longer offers enrollment in a bachelor's Program or a distance learning Program.

## Greenville

Greenville, a city of more than 70,000 people, is located in eastern North Carolina, midway between Raleigh, the state capital, and the Atlantic Coast and is within 125 miles of Norfolk and 157 miles of Richmond, Virginia.

Greenville is the home of the premier medical center of eastern North Carolina. ECU's Health Sciences Division, PCMH and the University Health Systems of Eastern Carolina serve the region. Four North Carolina Area Health Education Centers (AHECs) are headquartered in the region, with the twenty-three-county eastern AHEC headquartered in Greenville.

## PCMH/University Health Systems

Pitt County Memorial Hospital (PCMH) is the primary teaching facility for the Brody School of Medicine. The hospital provides an environment where patient care, clinical education and medical research flourish. The scope and complexity of hospital services are constantly expanding to meet the growing health-care needs of the community and the region. Originally a community hospital serving Greenville and Pitt County, PCMH now serves people in twenty-nine counties in eastern North Carolina.

PCMH is a tertiary care hospital with critical care units for medical, surgical, neurological, pediatric, coronary and cardiac surgery patients. Other facilities include outpatient medical and surgical units, a freestanding surgical center, a birthing center, cardiac catheterization laboratories and a hemodialysis center.

The close cooperation between the hospital and the School of Medicine has made possible the development of many services not available at most community hospitals. The exceptional relationship between the hospital, the medical school and private practice physicians is embodied in the formal name for the medical campus—University Health Systems of Eastern Carolina.

## The Physician Assistant Profession

Physician assistants (PAs) are highly qualified health professionals prepared through a demanding academic and clinical curriculum to practice medicine supervised by licensed physicians. As members of

the health-care team, PAs assume a broadly defined range of medical diagnostic and patient management functions that have traditionally been performed by physicians in both office practice settings and health institutions.

The maldistribution and shortage of health manpower in the 1960s gave rise to the concept of the PA. Today, the PA profession is one of the fastest growing health careers both in North Carolina and the United States. There are more than 75,000 PAs in the nation eligible to practice with more than 3,000 practicing in North Carolina. 38 percent of PAs work in family medicine and other primary care specialties, but the utilization of PAs has increased to include every field and subspecialty in medicine. Physician assistants have proven their effectiveness and ability to provide quality care in many settings—remote rural areas, major urban medical centers, physicians' private practices, hospitals, public health clinics, managed care organizations, the uniformed services, and other federal agencies. Employers in nonclinical fields, such as research and administration, are also utilizing the talents of PAs. The U.S. Bureau of Labor Statistics projects a greater than 50 percent increase in the number of PA positions by the year 2014, making the PA profession one of its top four career choices for the next decade.

A commitment to cost-effective, quality and compassionate patient care is the foundation of the PA profession. By assuming some of the duties traditionally performed by a physician, the PA enables the supervising physician to spend more time with patients with more serious or complicated medical problems. Physician assistants are educated to take medical histories, perform physical examinations, order and interpret tests, make diagnoses, establish and carry out treatment plans, suture wounds, assist in surgery, and provide preventive health counseling. In forty-nine states including North Carolina, plus the District of Columbia, Guam, the uniformed services, and other federal agencies, PAs have delegated authority to write prescriptions.

## Curriculum

The goal of the physician assistant Program at East Carolina University is to provide a primary care-oriented, rural-based training Program for entry-level health-care professionals. The educational objectives of the Program are based on the Accreditation Standards for Physician Assistant Education (2006) as established by the Accreditation Review Commission on Education for the Physician Assistant, Inc. (ARC-PA). The standards concentrate on the patient management skills of evaluation, monitoring, diagnosis, therapeutics, counseling, and referral. In meeting these goals and objectives, the PA Program will provide clinical experiences in rural communities.

## Pre-PA Phase

Qualified students must have a bachelor's degree to be considered for the intensive twenty-seven month PA professional track which begins in August of each year. The bachelor's degree must be completed by the end of the spring semester prior to admission. **All PA Program prerequisites must be completed by the end of the fall semester of the year prior to the fall of the anticipated year of enrollment. Example: All prerequisites must be completed by the end of fall 2009 for entry in the fall of 2010.** The prerequisite courses may be taken at any regionally accredited institution of higher learning including community colleges. Prerequisites will be accepted only with a letter grade, not with a Pass/Fail. All prerequisites must have been taken within five (5) years of application. We recommend that anatomy and physiology be taken within 2 years, but that is not a requirement. The academic advisor for ECU students is Jan Aycock at: [aycockt@ecu.edu](mailto:aycockt@ecu.edu). Applicants from other colleges or universities should have their academic advisors contact Ms. Aycock with academic questions or course equivalencies for ECU. There is no advanced placement, transfer credit or experiential learning credit

Revised 09/02/2009

within the ECU PA Program. AP, CLEP, Survey Course or Self-Directed Study course credit will not be accepted for any prerequisite courses.

**Course Prerequisites**

Required:

- Chemistry: one full academic year with lab
- Human Anatomy and Physiology: one full academic year with lab
- Microbiology: one semester
- Statistics: one semester
- Psychology: one semester
- Medical terminology: one semester
- Genetics: one semester

(Academic year: One full year whether semesters or quarters)

We **do not** accept ECU BIOL 2130/2131 to fulfill any portion of the human anatomy and physiology prerequisites. ATEP 2800 will now be accepted for medical terminology.

**Professional PA Training-Didactic Phase**

The on-campus didactic curriculum is fifteen months in length consisting of 59 semester hours conducted on the campus of ECU. The curriculum is oriented toward primary care infused with content related to unique problem and issues of health-care delivery in remote settings.

Didactic Curriculum		Semester Hours
<b>Fall I</b>		
PADP 6030	Clinical Gross Anatomy	5
PADP 6040	Human Physiology	5
PADP 6050	Intro. to Clinical Medicine	3
PADP 6200	History and Physical Exam I	2
PADP 6000	Role of Physician Assistant	1
		16
<b>Spring</b>

PADP 6810	Medical Ethics	2
		16
Didactic Total		59

**Professional PA Training-Clinical Phase**

The twelve-month clinical phase equals 40 semester hours with more than 1,900 contact hours of patient care. Eight clinical rotations are conducted at a variety of clinical sites located in Eastern North Carolina with priority given to rural, medically underserved areas.

Clinical Curriculum		Semester Hours	
<b>Spring II, Summer II and Fall III</b>

<b>Program Total</b>		<b>99</b>	

**Program Course Descriptions**

**Didactic Phase:**

**PADP 6030. Clinical Gross Anatomy (5)**

Structure of the human body with emphasis on clinical applications, virtual anatomy lab and clinical case studies. Cadaver pro-sections will be included with some labs.

**PADP 6040. Human Physiology (5)**

Physiological principles fundamental to living tissue. All systems of the body studied as they relate to normal and pathological conditions in humans. Case studies presented

**PADP 6000. The Role of the Physician Assistant (1)**

Introduces medical ethics, nonclinical aspects of dependent practice, and roles of other health care providers involved in medical team approach to medical care and disease prevention. Explores different cultures and their perception of medicine, legal issues, quality assurance, and risk management.

**PADP 6010. Diagnostic Methods I (3)**

Laboratory procedures used to identify pathophysiological processes as well as the appropriate rationale for ordering them. Interpretation of laboratory results and treatment options. Electrocardiography and radiography introduced.

**PADP 6020. Diagnostic Methods II (3)**

Continuation of PADP 6010. Emphasize ordering and interpreting lab tests in organ system based pathological case studies. Interpretation and ordering of electrocardiography, radiography, and MRI, CT, and PET scans.

**PADP 6050. Introduction to Clinical Medicine (3)**

Introduction to clinical medicine with an emphasis upon medical problem solving utilizing the patient management format. Case studies used to develop clinical problem-solving skills and an understanding of the diagnostic process.

**PADP 6150. Clinical Medicine I (5)**

Clinically-oriented didactic preparation for clinical rotations. Etiology, pathophysiology, clinical manifestations, and appropriate management of selected disease entities. Enhances acquisition of skills to formulate a diagnosis and treatment plan.

**PADP 6200. History and Physical Examination I (2)**

Emphasizes patient interviewing, communication skills, and counseling skills utilizing standardized patients. Includes lectures, interviewing labs and role-playing exercises. Normal physical examination presented and proper use of instruments and techniques used in performing physical examination.

**PADP 6210. History and Physical Examination II (3)**

Continuation of 6200. Emphasizes the adult physical examination including the obstetrical and gynecological examination. Students practice their interviewing and physical exam skills with simulated patient encounters utilizing standardized patients.

**PADP 6220. History and Physical Examination III (3)**

Continuation of 6200 and 6210. Emphasizes the physical examination of the pediatric patient and the geriatric patient utilizing standardized patients.

**PADP 6250. Clinical Medicine II (4)**

Continuation of PADP 6150. Clinically-oriented didactic preparation for clinical rotations. Etiology, pathophysiology, clinical manifestations, and appropriate management of selected disease entities. Enhances acquisition of skills to formulate a diagnosis and treatment plan.

**PADP 6500. Pharmacology & Pharmacotherapeutics (4)**

General principles of pharmacology and toxicology as related to the medications used in the treatment of injury or disease conditions affecting the body systems as discussed in PADP 6150, 6250.

**PADP 6650. Surgery and Emergency Medicine Skills (4)**

Clinically-oriented didactic and lab skills related to knowledge and skills needed in emergency department and surgical arena. In depth focus on acute and surgical conditions encountered in primary care and surgical settings. Pre-operative and post-operative care as well as surgical preparation to be properly demonstrated.

**PADP 6680. Introduction to Clerkship (4)**

Emphasizes preparation for required clinical practicum experiences. Students practice history taking skills, physical exam skills, presentation skills, critical thinking skills and prescription writing. Standardized patients will also be utilized.

**PADP 6800. Behavioral Medicine Clinical Practicum. (2)**

Emphasizes fundamental principles underlying human behavior, including physiological development, learning, memory, motivation, and social and abnormal behavior. Emphasis on improving communication skills and integrating knowledge of psychosocial principles and diagnosis with the clinical situation.

**PADP 6810. Medical Ethics and Jurisprudence (2)**

Develop critical skills necessary to identify, analyze and resolve ethical, legal and professional issues.

**PADP 6850. Health Promotion/ Disease Prevention (2)**

Explores preventable disease and resources for health maintenance and risk factor education within the community. Considers communicable disease, acute disease, chronic disease, environmental health, occupational medicine and epidemiology.

**PADP 6980. Research Project (4)**

Research and writing prospectus. Students prepare and submit a manuscript for evaluation. Students will be instructed and monitored in the stages of developing a text suitable for publication.

**Clinical Phase:**

**PADP 6310. Behavioral Medicine Clinical Practicum (5)**

Assignment to a psychiatric and/or behavioral clinical inpatient or outpatient setting. Facilitates the acquisition of communication and behavioral modification skills useful in the primary care setting.

**PADP 6320. Internal Medicine Clinical Practicum (5)**

Application of basic medical knowledge to the problems and situations encountered in an internal medicine practice

**PADP 6330. Family Medicine Clinical Practicum (5)**

Emphasizes the outpatient evaluation and treatment of conditions common at the family medicine/primary care level and the appropriate health maintenance measures for different age groups.

**PADP 6340. Surgery Clinical Practicum (5)**

Emphasizes routine health care of a variety of surgical inpatients and outpatients. Student is assigned to a surgical team with emphasis on the perioperative patient care in general surgery.

**PADP 6350. Emergency Medicine Clinical Practicum (5)**

Evaluation and management of emergency and surgical problems seen in emergency department. Initial evaluation of potential surgical conditions and performance of problem-specific exams, emergency procedures, and minor surgical skills.

**PADP 6360. Pediatrics Clinical Practicum (5)**

Assignment to institutional setting or community-based pediatric site. Emphasis on communication skills and relating sensitively to children and parents. Familiarization with normal growth and development, pediatric preventive medicine, and evaluation and management of common childhood illnesses.

**PADP 6370. Women's Health/Prenatal Care Clinical Practicum (5)**

Provide the student with clinical experiences in prenatal and women's health care. Emphasis will be placed upon the examination of the female patient with focus on the most common gynecologic problems and prenatal patient evaluation and care. Obstetrical labor and delivery and gynecologic surgery will be at the discretion of the preceptor.

**PADP 6380. Geriatrics Clinical Practicum (5)**

Provides a clinical experience with geriatric patients with multiple medical problems and medications. Students will also gain experience with the financial problems encountered in the Medicare/Medicaid population.

**Accreditation**

East Carolina University is accredited by the Southern Association of Colleges and Schools to award bachelor's, master's, and doctoral degrees. In addition, the University is a member of or accredited by more than sixty state and national associations and agencies.

The East Carolina University Physician Assistant Program is accredited by the Accreditation Review Commission on Education for the Physician Assistant, Inc. (ARC-PA).

**Professional Organizations**

**PAEA**

The PA Program at East Carolina is an active member of the Physician Assistant Education Association (PAEA).

This group provides PA Programs a forum for the exchange of ideas and research on many educational issues.

<http://www.paeonline.org/>

**AAPA**

Faculty and graduates of the East Carolina Program are members of

Revised 09/02/2009

the American Academy of Physician Assistants (AAPA), the professional organization representing physician assistants. AAPA takes an active role in determining the direction and development of the PA profession. <http://www.aapa.org/>

### NCAPA

Faculty and many PA students are members of the North Carolina Association of Physicians Assistants (NCAPA). <http://www.ncapa.org/>

### NCCPA—PANCE

The National Commission on Certification of Physician Assistants Inc. (NCCPA) administers the Physician Assistant National Certifying Examination (PANCE) and the Physician Assistant National Recertifying Examination (PANRE) each year. Graduates of the PA Program at East Carolina are eligible to sit for the PANCE. All states, including North Carolina, now require that PAs be certified in order to practice. <http://www.nccpa.net/>

## Admission Requirements

Admission to the Program is very competitive with the number of applications expected to more than exceed the 30 seats available in the one class selected each year to begin in the fall semester. The applicants accepted into the Program must have a grade point average (GPA) and general GRE scores to satisfy the requirements of the ECU Graduate School. (<http://www.ecu.edu/gradschool/>.) The decision to interview an applicant is based upon GPA and GRE scores. To be competitive, a general GRE cumulative verbal and quantitative score should be at least 1000 and the Analytical Writing score should be a minimum of 4.0. Overall GPA should be at least 3.0 to be competitive. The Department of Physician Assistant Studies prerequisite courses listed in this document must be completed with a cumulative GPA of at least a 3.0 on a 4.0 scale. Any exceptions must be approved by the Department Chair. Recent Program GPA and GRE results may be found in FAQs under *Links* on the Introduction page.

### Pre-Admission Clinical Experience for all Applicants

Clinical experience that includes direct patient care is **not required**. Having a specific number of hours (or months) of health-care experience is not a requirement for application or selection to the ECU PA Program.

### Criminal Background Checks and Drug Screens

Due to certain federal, state and local institutional regulations, the SAHS has established a policy regarding criminal background checks and drug screening. ECU and the PA Program are not responsible for reviewing background checks, ordering them or paying for them. If a student cannot finish the clinical portion of the PA Program professional curriculum because of negative item/s in a criminal background check, that student will not graduate. Neither ECU nor the PA Program will be held liable for a student's failure to graduate or failure to obtain a state license because of a criminal background or use of drugs or alcohol. Students will be subject to institutional and ECU policies regarding alcohol and drug use.

## PA Technical Standards

A student admitted into the East Carolina Physician Assistant Program must meet basic and essential requirements that are necessary for obtaining employment and performing as a Physician Assistant. The technical standards each student must master include cognitive, physical and behavioral characteristics. Reasonable

accommodation for persons with documented disabilities will be considered on an individual basis, but a candidate must be able to perform in an independent manner. All students must possess the intellectual, ethical, physical, and emotional capabilities required to undertake the full curriculum and to achieve the levels of competence required by the faculty. The following skills are required, with or without accommodation:

### Minimum Technical Standards include:

**Critical Thinking.** All students must possess the intellectual, ethical, physical, and emotional capabilities required to undertake the full curriculum and to achieve the levels of competence required by the faculty. The ability to solve problems, a skill that is critical to the practice of medicine, requires the intellectual abilities of measurement, calculation, reasoning, analysis, and synthesis. Candidates for the Program must be able to perform demonstrations and experiments in the basic sciences.

**Communication Skills.** A candidate should also be able to converse with patients as well as hear and observe them in order to elicit information, describe changes in mood, activity, and posture, and perceive nonverbal communications. The candidate must be able to communicate effectively and efficiently in oral and written forms.

**Visual Ability.** Candidates must also be able to observe a patient accurately, both at a distance and close at hand. This ability requires the functional use of vision and somatic sensation.

**Hearing and Tactile Abilities.** Candidates should have sufficient motor function to elicit information from patients by palpation, auscultation, percussion, and other diagnostic techniques.

**Mobility and Fine Motor Skills.** A candidate should be able to execute movements reasonably required to move from area to area, maneuver in small places, calibrate and use large and small equipment, position and move patients, and provide patients with general care and emergency treatment.

**Interpersonal Abilities.** A candidate for the PA Program must possess the emotional health required for full utilization of his or her intellectual abilities, the exercise of good judgment, the prompt completion of all responsibilities required for the diagnosis and care of patients, and the development of mature, sensitive, and effective relationships with patients, families, and colleagues.

East Carolina University seeks to fully comply with the Americans with Disabilities Act (ADA). Students requesting accommodations based on a covered disability must go to the Department for Disability Support Services, located in Slay 138 on East Campus, to verify the disability before any accommodation can occur. The telephone number 252-737-1016 and the web site is: <http://www.ecu.edu/cs%2Dstudentlife/dss/>

## Financial Information

### Tuition and Fees

East Carolina University is a publicly supported institution. Tuition and fee schedules are subject to change each year as mandated by the North Carolina General Assembly.

Information regarding education costs and refunds may be found at: [http://www.ecu.edu/financial\\_serv/cashier/](http://www.ecu.edu/financial_serv/cashier/). These are only estimates and are subject to change. At the present, estimated

Revised 09/02/2009

tuition and fees for the entire professional curriculum are as follows: In state=\$17,915; Out of state=\$56,333. Information regarding criteria for residency may be found in the Graduate Handbook at: [www.ecu.edu/gradschool](http://www.ecu.edu/gradschool).

### Other Expenses

Students must obtain and show proof of personal health insurance prior to starting the training and must maintain that insurance throughout the professional Program

The Department requires students to have a laptop computer with certain specifications. Those specifications will be provided upon acceptance to the Program. Students are advised not to purchase laptop computers without those specifications. If purchased through the ACE program at ECU, the current approximate cost of the laptop is \$1450.00. Information may be obtained at: <http://www.ecu.edu/cs-itcs/ace.cfm>

Students must expect the expense of obtaining criminal background checks and drug screens at many of the clinical sites. The cost varies.

All students must maintain liability insurance throughout the professional curriculum. The amount of the premium is determined each September and at the present is \$72.00.

Current Basic Life Support (BLS) certification from the Red Cross for Professional Rescuers or the American Heart Association for Health Care Providers must be presented to the PA Department upon acceptance into the Program and must be maintained throughout the professional curriculum. No other certification will be accepted. The cost is approximately \$100 annually.

Students must pay a \$25.00 fee each semester to help defray the cost of OSCE and the physical assessment facilities.

The following costs are estimates only. Expenses may be greater on certain items than indicated. The Program is of 27 months duration: Didactic Phase ("Year One") =15 months; Clinical Phase ("Year Two") =12 months.

Graduate School Application= \$60.00  
Student Identification Badge & Patches=\$15.00  
White Jacket and Scrubs=\$150.00  
Miscellaneous Testing Fees including PACKRAT/ACLS=\$350  
Books/Supplies– Didactic Phase = \$1,500.00 +/-  
Books/Supplies– Clinical Phase = \$400.00+/-)  
Medical Instruments –\$700.00+/-  
Pager during the clinical year–\$5 to \$10 per month  
Parking–\$144.00 per year

During year two (clinical), the student must plan for the expense of rotations away from campus (e.g., living expenses, transportation, etc.). Cost could be \$100 to \$150 per semester in some cases. Employment during enrollment is strongly discouraged. Tuition/fees and other costs are subject to change without notice.

### Financial Aid

Through the use of federal and state funds, as well as contributions from its many friends and alumni, East Carolina University makes every effort to assist students in the continuation of their education. Three main types of financial assistance are available to qualified students—educational loans, part-time employment, and gift aid consisting of grants and scholarships. The university participates in the following federal and state Programs which provide funds on the basis of financial need:

PA Foundation Scholarship Program  
Bunting Scholarship  
North Carolina Academy of Physician Assistants Scholarship  
North Carolina Health, Science, and Math Loan Program  
The University of North Carolina Minority Presence Grant Program  
North Carolina Rural Health Association Grant Program  
U.S. Rural Health Association Grant Program  
U.S. Public Health Service  
U.S. National Health Service  
U.S. Department of Veterans Affairs  
Pell Grant  
Supplemental Educational Opportunity Grant  
Perkins Loan  
Work-Study Program  
Stafford Student Loan Program  
Other Federal Loan Programs

The Office of Student Financial Aid assists students in obtaining funds from sources best suited for the individual's need. Please direct all matters concerning financial aid to the Office of Student Financial Aid at 252-328-6610 or at their web site: <http://www.ecu.edu/financial/>

Students are encouraged to obtain financial aid, if needed, rather than seek employment during their professional education because of the academic and clinical time demands of the curriculum. Part-time employment by PA students at ECU is **strongly** discouraged.

### Housing

East Carolina maintains fifteen residence halls that provide a range of living environment options. Housing is also available in the surrounding Greenville and Pitt County residential areas. On-site students are responsible for obtaining their own housing in the Greenville area during the didactic phase of the curriculum. Detailed information regarding university housing is available through University Housing Services at 1-800-328-7668 or 252-ECU-HOME (328-4663) or <http://www.ecu.edu/campusliving/>. The student should be ready for travel by personal vehicle. Since many clinical rotation sites are away from the Greenville area, all students should expect to be assigned to these away sites and should anticipate the need to find housing in these areas during the clinical portion of the Program. Clinical coordinators will work with AHEC about potential housing at these away sites; however, neither AHEC nor the Program guarantees to provide housing.

### Application Process

Applications are accepted for admission consideration only from citizens or permanent residents of the United States who are also residents of one of the following states: North Carolina; South Carolina; Georgia; Tennessee; and Virginia. Preference is given to residents of North Carolina.

The ECU Physician Assistant Program participates in the Central Application Service for Physician Assistants (CASPA). All applications to this Program must be submitted through CASPA at: <http://www.caspaonline.org/>. All applicants must apply to the ECU Graduate School when accepted for enrollment in the Program. The graduate school application process and all necessary application materials, to include official general GRE scores and official transcripts, may be identified through the ECU Graduate School web site at <http://www.ecu.edu/gradschool/>. The institutional code for the GRE is 5180. Direct any questions regarding the Graduate School to the Graduate School and not to the PA Program.

ECU is an equal educational opportunity institution; all applicants for admission to the PA Program are considered without regard to race, color, national origin, religion, gender, age, sexual orientation or

Revised 09/02/2009  
disability.

Applications will be accepted by the PA Program only after the CASPA packet is finished and reviewed for thoroughness. **The completed application deadline for CASPA is October 1.** Candidates will be notified by mail when the Program has received the completed CASPA form. **Please do not contact the Program regarding application status.** For questions concerning the Graduate School requirements, please contact them.

All students accepted to the Program must possess a bachelor's degree or higher and must have completed the PA Program prerequisites. If the prerequisite courses are not finished at the time of application, the applicant must document how the remainder of those courses will be completed by the end of the fall semester of the year prior to the fall semester of anticipated enrollment in the Program. Official transcripts documenting completion of the prerequisites must be received by the Program no later than May 15. Official transcripts showing completion of a bachelor's degree must be received by the Program no later than June 15, and appropriate documentation must be sent to the Graduate School per their requirements. Previously stated GPA standards must be maintained with the courses being currently taken. All students accepted for admission must document with the Program no later than May 15 that all immunizations or appropriate titers under Sections A and B of the Student Health Application have been completed or are in progress if immunization requires a series of injections. The Student Health Service web site is at: (<http://www.ecu.edu/cs-studentlife/studenthealth/index.cfm>)

These immunizations are the only Health Screening requirements of the Program.

## Admissions Decisions

The completed CASPA packet including GPA and GRE and analytical writing scores is used by the PA Program to determine which candidates should be invited for an interview. Admissions decisions are based upon the CASPA packet contents and upon how well a candidate interviews. The ECU PA Program has a "rolling" interview process which will begin in January after completed application packets are received from CASPA. Therefore, early applicants may be rewarded with early interviews and possibly with early offers of admission.

Important aspects of the interview will include the candidate's maturity, grooming, communication skills, poise, self-confidence, professional goals and knowledge of the PA profession.

Once the class is filled, there will be no more interviews.

## Program Faculty/Staff

- Larry Dennis, MPAS, PA-C  
Department Chair
- Dale Newton, MD  
Medical Director
- Kelly Brilliant, MPH, PA-C  
Faculty
- Spencer Cole, MPAS, PA-C

## Visitor Information

For potential applicants, the PA Program conducts a "Closer Look" meeting each quarter during the year. This meeting is for general information and not to answer each individual's specific questions regarding such items as prerequisites. Specific questions may be asked at: [pastudies@ecu.edu](mailto:pastudies@ecu.edu). The final scheduled meeting for 2009 is November 6. The scheduled meetings in 2010 are: February 12; May 7; August 6; and November 15. The Program may be contacted to reserve a place for "Closer Look" at: [pastudies@ecu.edu](mailto:pastudies@ecu.edu). Further information regarding ECU and the PA Program such as student withdrawal, tuition refunds, student work policies, etc. may be found in the *Physician Assistant Student Handbook* which is available on this web site under *Links*. More information about the Program may be found in *Links* under FAQs, and a map to the location of the Health Sciences building may be found at *Links* under the PA Portal tab.
