UNIVERSAL DESIGN FOR LEARNING

How can education change to meet the demands of effectively educating an increasingly diverse student population with the skills, knowledge, and abilities' they need to be productive and successful American citizens in the 21st century?

One possible solution is to create classrooms, teachers, and schools that embrace the progressive and inclusive practices espoused by Universal Design for Learning (UDL).
Educators are seeing…

- Diversity in the classroom increasing
- Mandated movements to recognize and respect diversity and promote Global awareness
- A push for inclusionary policies and practices
- A move to standards based curriculum and increased accountability of total student achievement
- Growing access to and emphasis on technological advances
Objectives

• Define UDL

• Identify and describe the 3 major principles of UDL

• Recognize representative classroom examples of UDL and its guiding principles
Watch this short video produced by CAST, a leading organization dedicated to the advancement of and propagation of UDL. This video will give you a succinct but informative introduction to UDL.
