The LIS Curriculum Committee met on December 2, 2013 at 10:30 in 2014 Bate.

Present: Drs. Jami Jones, Barbara Marson, and Lou Sua

Marson discussed the meeting that the Academic Pathway faculty had on November 22, 2013 regarding the curriculum for that pathway. In that meeting, the faculty identified three areas for short-term course development: information literacy, organization of electronic resources, and community college libraries. They also identified long-term goals in developing courses in digital libraries, archives and preservation, quality assessment, metadata, and health-related librarianship.

The academic library faculty proposed that the program should initially focus on teaching a course on community college libraries since we offer the certification in community colleges. The MLS Curriculum Committee decided to bring this discussion before the general faculty.

The MLS Curriculum Committee reviewed plans for a faculty curriculum workshop for January 27, 2014. It was decided that a discussion regarding a grant-writing workshop would be brought before the faculty at that workshop.

The meeting adjourned at 11:30.
