Yontz presented a draft of the Standard V. Administration and Finance report. The report included extensive notes about how Yontz intended to approach a number of sub-Standards to address future administrative structures, describe the departmental merger of the Department of Library Science and the Department of Business and Information Technologies Education, provisions for the assurance of future leadership and autonomy, and next year’s budget picture. Given the uncertainty of budget projections for the foreseeable future, it may not be possible to develop reliable projections until more is known. Faculty offered comments and suggestions on further development of the document.

Valentine had distributed a draft of the Standard VI. Physical Resources and Facilities report earlier via email and faculty offered comments and suggestions.

Munde agreed to send Yontz and Valentine individual Word files of these Standards from the 2011 candidacy application.
