5.4.d – Licensure information on school/clinical faculty (e.g., cooperating/mentor teachers, internships, supervisors, etc.)

As noted in Section 5.1, university supervisors must meet equivalent alternative credentialing requirements such as, a Master’s degree, NC supervision licensure, or other qualifications—prior to serving in this capacity. Cooperating (Clinical) teachers who mentor candidates during internships, hold appropriate licenses to be deemed “highly qualified” in their respective areas.

The ECU EPP developed dashboards for Cooperating (Clinical) teachers and university supervisors in the EPP. Data is available through the links below.

- UG Cooperating (Clinical) Teacher and University Supervisor Licensure Dashboard

Additional information about clinical teacher and university supervisor selection is available in the Standard 3, Exhibits–3.4.c.
