The School of Social Work Professional Development Lecture Series

We are pleased to announce the eighth year of the School of Social Work Professional Development Lecture Series. The School of Social Work developed this series to serve the continuing education needs of ECU alumni, practicing social workers, and other professionals in the human services field. In addition, this series was designed to enhance the educational opportunities for our students in the field. It is also a way to give back to our field instructors, who provide service to our school through their ongoing support and training of our students in their internships throughout Eastern North Carolina.

Our lectures are presented by faculty, community practitioners, and experts in their field. This upcoming year, we have planned several workshops on a diverse amount of topics. For registration information, please call 252-328-9198. All of the workshops will be held at the East Carolina Heart Institute (115 Heart Drive, Greenville, NC) and are held from noon until 2pm. Two contact hours of continued education (0.2 CEUs) will be awarded upon completion. The cost for students and field instructors is $5.00 per workshop.
