Subject: Mr Aycock

Dear Sir,

What is this country coming to ? It seems everyone is offended by something or someone, and seeking to air their grievance. I am writing about the proposed name change on a dorm, Gov Aycock. What exactly did this man do ? Are we as a country jumping through hoops to appease special groups, or anyone who screams loud enough ? Have you ever made a political contribution ? Was that contribution to a group that a special group does not like ? Then you could be next, for the very same so called crime. Please do not jump to change just because someone isn't happy. If that is really justified, then most everything has to be change to appease someone. Who has not offended someone at some time. I for one am sick and tired of hearing people cry because someone said or did something they did not like. Was Mr Aycock the ring leader in a lynch mob ? Was he the Grand Dragon of the KKK, No he wasn't, then why disgrace his name, spend the money for the changes and further enable a special group. Where will it stop ? The building was named for Gov Aycock for a reason, then leave it be. Don't jump to enable a special group, leave it be. If you do go along with those groups who are already well enabled in this country, then I think you should also be investigated as to who you vote for, what church you attend, your political views and where you shop and eat. I'm sure that one of those areas does not make someone happy, someone will be offended by your actions and views as well. Should we move to have you changed as well ? Where does this stop. enough is enough.....if you go along with this change to enable a special group then my family will no longer support ECU or any function or activity in any manner. Somebody needs to man up and tell these special groups to grow up or move on. Enough is enough...I hate it, but we will never again support anything associated with ECU if this change takes place.

Thank you

David Peed
