Computer Skills: Microsoft Office 2004, Proficient in AutoCAD 2004, Adobe Photoshop

Interior Design Projects Completed:

- * **The Courtyard Tavern and Restaurant**- Remodeled a restaurant in order to illustrate concepts of lighting through design. Our team created a system which allowed causal lighting during the day by use of more natural lighting, but at night was transformed into a formal restaurant with the help of ambient lighting and focal glow concept. The renovations not only saved energy but also got rave reviews from the class jury.
- * **New Day Designs Design Firm**- Our team created an actual design firm that describes ethical, legal, and business aspects of the Interior Design profession. We interviewed a variety of design firms in the area to reach an understanding of their business and marketing techniques. We created a successful and functional design firm.
- * **Tiger Tops Lodge in Nepal**- Design a 1500 sq./ft. gathering place anywhere in the world using the concepts of sustainable design and reflective of the culture. I used an existing lodge in Nepal but remodeled the entire interior to use products that were sustainable. The project was entered into an IIDA sustainable design student competition thorough East Carolina University.
