Objective: A position as a .NET programmer in the software industry where I can use my skills in programming, design, and inter-personal communication to build dynamic software and help my company become a global leader.

Functional Abilities:

Coding & Testing	OO Programming	Project Management	Software Architecture
GUI Development	User Interface Design	Web Application Servers	Application Development
Database Design	Network Configuration	E-Commerce	

Languages:

Visual Studio .NET	C# / Visual Basic	C / C++	Java / J2EE	Prolog	Fortran
CGI / Perl	SQL Server	PL / SQL	Oracle	Lisp	XML

Web / Software:

HTML	JavaScript	Fireworks	Dreamweaver	Rational Rose	MS Visio

Certifications:

CCNA (Cisco Certified Network Associate)

Major Projects

- **Sound to Sea:** Throughout the past year and a half I have been developing an educational game in Java for my assistanceship with ECU. Provided with an initial idea I designed the rules of the game, the underlying structure, and the GUI interface to create a fully functional game. Helper applications are provided for non-technical users to make updates. I have created a solid object oriented design with appropriate javadoc comments to make future additions easy for the next student who works on this project.
- **Imagine Cup:** Sponsored by Microsoft the goal is to design an application tailored to the pocket PC using Visual Studio.NET. I developed the concept for our product and was team leader of my group. Product functionality included data gathering from the web and stored sales data in a database. We received first place at our school allowing us a spot at the next level of competition.
- **Senior Design Project:** Our team worked with the NCSU Aquatic Ecology department to develop a comprehensive database with web interfaces using Visual Studio.NET, ASP.NET, and Chart FX. We enhanced our skills working with real customers, holding efficient meetings, and giving presentations.

Professional Experience

- **Java/VB Programmer,** ECU Computer Science: Worked for professors on long term programming projects in Visual Studio & Java and tutored undergraduate students in computer science. 20 hrs/week (fall/spring semesters), 40 hrs/week (summers). ('03 –'05)
- **Network Engineer Co-op,** Cisco Systems: Configured and designed networks using Cisco's latest routers and switches and worked directly with lead engineers to construct demos for enterprise scale clients. ('02 –'03)
- **VB Programmer,** First American Real Estate Solutions: Designed programs in Visual Basic 6 for use with Microsoft Access database files to automate procedures. Collaborated with other team members to decipher document codes and interpret maps. ('01)
- **IT Technician,** NC State ResNet: Position involved customer service, hardware and software troubleshooting for networking related problems, and hardware installations. On-site assistance in dorm rooms and phone support provided. ('99 – '01)
- **IT Technician,** Xtrasource: Repaired IBM compatible PCs, resolved NT network issues, and provided customer service. (Summer '00)
- **Entrepreneur:** Throughout high school I was already taking advantage of my passion for computers by marketing my talents to local businesses. I offered a variety of services included tutoring, web page design, and programming for private individuals, the local computer shop and, small businesses in my home town including Maggie Valley town hall ('95 – '99)

Education:

East Carolina University: M.S. Computer Science (May 2005), Current GPA: 3.625
North Carolina State University: B.S. Computer Science (May 2003), Minor: Business, Cum Laude
