Doctor of Philosophy in Nursing

Program Description
Advancements in nursing science and health care emerge from the creative research and theory development of nurse scientists. The professionals behind such innovations are most often those who hold a doctorate of philosophy, or PhD. These researchers and scholars who explore and develop the science that drives nursing practice and education are the stewards of the discipline.

The ECU College of Nursing PhD program prepares students for this crucial leadership role. Students are prepared to design and implement a unique research project that will contribute to a lifelong program of discovery and contribution in nursing. Students also develop skills and analytical ability to collaborate on interprofessional projects. The curriculum enriches learning through study in the social, behavioral and biological sciences, and the areas of administrative leadership and nursing education.

The PhD program prepares graduates to:
- Integrate philosophical, conceptual, and methodological foundations to guide the generation of new nursing knowledge.
- Conduct scholarly inquiry that contributes to a body of nursing science.
- Develop expertise within an area of bio-behavioral or systems nursing science.
- Demonstrate interprofessional collaboration in advancing nursing science.
- Disseminate research findings through multiple modes including publications and presentations.
- Demonstrate professional stewardship through service and leadership.

The ECU College of Nursing offers a DNP to PhD, MSN to PhD and a BSN to PhD option. All applicants must meet general PhD program admission criteria. The BSN to PhD option blends the doctoral curriculum with two different MSN concentrations: the nursing education concentration or the nursing leadership concentration. This option reduces the number of master’s level courses required in the traditional MSN program and facilitates completion of the PhD in nursing. The DNP to PhD builds upon the previous doctoral education to develop research skills and competencies. DNP to PhD students, with permission of the PhD Program Director, may include up to 15 semester hours from a DNP program to partially fulfill requirements of the 54 semester hour PhD program.

Requirements for Admission
Admission to the Doctor of Philosophy in nursing program requires the student to meet the minimum admission requirements for graduate study of the university and the following requirements of the College of Nursing:

- Satisfactory performance on the Graduate Record Examination (GRE) or Miller Analogies Test (MAT) (Required for BSN to PhD only; Preferred – MSN and DNP to PhD applicants).
- Written essay describing impetus for pursuing a PhD in nursing, research and scholarship goals (400 word limit).
- Two written professional references from individuals with expertise to comment on the applicant’s capability for research and scholarship (for example, university professors, employers). At least one of the references must be from a doctorally-prepared nurse.
- A master’s degree in nursing from a Commission on Collegiate Nursing Education (CCNE) or National League for Nursing Commission for Nursing Education Accreditation (CNEA) accredited school. (Applicants without a MSN must have a BSN from an accredited program.) See below for details on the BSN to PhD admission requirements.
- Minimum grade-point average of 3.2 on a 4.0 scale on all graduate work.
- Evidence of current unrestricted license to practice as a nurse in North Carolina or a NCSBN compact state. Students on foreign student visas must present evidence of professional standing in their respective countries. BSN to PhD students must gain an unrestricted license by the end of the fall semester of the year of admission to continue in the program.
- Satisfactory performance on Test of English as a Foreign Language (TOEFL) where English is not the first language.
- Computer competency, with proficiency in basic software. The university requires that all students use e-mail and World Wide Web access for communication and course work.
- A graduate statistics course which included inferential statistics or other statistical refresher course approved by the PhD Program Director.
- A current curriculum vita.
- A recorded interview via InterviewStream, available through ECU. https://ecu.interviewstream.com/Account/Login?ReturnUrl=%2f

Applicants for admission to the BSN to PhD option must meet general admission requirements for the PhD program. Additional requirements include:

- Minimum GPA of 3.3 and no grade below “B” on all previous coursework.
- BSN from an accredited nursing program.
- Approval of the Director for the MSN concentration selected and the PhD Program Director.
- A graduate statistics course which includes inferential statistics prior to enrolling in doctoral courses.

Applications are due March 15 each spring for the following 11 week summer session.

</table>

**Total s.h. hrs.** 6

**Total for Year 1 s.h. = 21**

### YEAR 4

<table>
<thead>
<tr>
<th>Summer Semester 10</th>
<th>Fall Semester 11</th>
<th>Spring Semester 12</th>
</tr>
</thead>
<tbody>
<tr>
<td>NURS 8255  Directed Research*</td>
<td>NURS 8200 Grant Writing</td>
<td>NURS 9000 Dissertation Research***(if needed)</td>
</tr>
<tr>
<td>NURS 9000  Dissertation Research***</td>
<td>NURS 9000 Dissertation Research***</td>
<td>NURS 9000</td>
</tr>
</tbody>
</table>

**Total s.h. hrs.** 6

**Total for Year 4 s.h. = 12**

**Total for Year 2 s.h. = 20**

**Total for Year 3 s.h. = 19**

**TOTAL PROGRAM HOURS: 72**

*All students must have at least 6 semester hours of research and 6 semester hours of an elective.

**Candidacy exam must be successfully completed before registering for dissertation.

***Students must take a minimum of 6 semester hours of NURS 9000. Students must be continuously enrolled until the dissertation is completed (except summers).**
